PROFESSIONAL SUMMARY

I'm a Software developer, passionate about creating visually stunning, functionally flawless websites and smart software applications. I continuously explore new technologies and push my boundaries to deliver the best possible results for my clients.

AREAS OF EXPERTISE

- **PHP(Laravel, CakePHP, Yii2)**
- **AWS**
- **MySQL, Redis, MongoDB, PostgreSQL**
- **Wordpress, WooCommerce**
- **API Development, JSON**
- **Javascript, ReactJS, Vue**
- **Ansible, Docker, Terraform**
- **Git, Github, Code Reviews**

Key Highlights

- **PHP Frameworks:** Strong knowledge of PHP web frameworks such as Laravel, CakePHP, Yii2. Solid understanding of MVC design patterns and object oriented programming.
- **API:** Proficiency in building and consuming APIs. Have worked with amazon aws api, ebay, paypal, Flinks, weather api.
- **MySQL**: Experience in working with MySQL databases and building DB models.
- **DevOps** : Understanding of DevOps practices, including docker containers.
- **GIT** : Solid understanding of all concepts of version controlling platforms like Git, Github.

EXPERIENCE

Software Developer At True North Mortgage (Dec 2021 – Current) : *A residential mortgage broking firm with 150+ employees, over $1 Billion + in lending, with retail outlets in all the major cities across Canada.*

I am currently working here as a Software Developer. Major responsibilities include developing new features for the inhouse software applications, writing robust yet DRY, maintainable and testable code in a timely manner .

- **PHP Frameworks:** Migrating code to Yii framework from the legacy software built on CakePHP.
- **Integration of Amazon AWS S3 API:** integrated amazon s3 api to securely upload and store objects.
- **Integration of Flinks API:** Integrated Flinks API which enables mortgage agents to quickly, easily and securely capture all the financial information related to customers bank accounts for the verification of the down payment required for the mortgage.
- Build **Ladder system** for agents, developed functionality for **manager and moderator roles**, a **CES system** for marketers.

Senior Software Developer At Login Infocom Pvt Ltd (Feb 2015 – Mar 2021): An electronic gadgets trading firm with global presence, having warehouses in UK, USA, Dubai, China and office in India, with 200+ employees and approx 1 Million pounds + in revenues, trading on 23 ebay stores, selling across Europe and North America.

I worked at Login Infocom for a period of 6 years where I was leading a team of 5+ people. Primary responsibility was to design, develop and maintain websites and inhouse software applications.

- **Integration of Ebay & Paypal APIs:** Integration of ebay apis for fetching competitor data. Built a webpage which would show real time balance for all currencies for all the 12+ PayPal accounts. Developed a custom software for the customer care team which enabled them to make PayPal refunds.
- **Warehouse Management Softwares:** Developed Inventory, Supply Chain Management, Warehouse Stock Counting System for managing goods, suppliers & purchase orders .
- **Use of Content Management System:** such as Wordpress to build stores and sales modules. The wordpress stores were linked with live ebay accounts and were used to push listings in bulk, saving a lot of time, resources and speeding up sales activity. The sales team were able to push 500 listings at a time on ebay across multiple channels in various languages.

Software Engineer At WebInnov8 Limited (Oct 2011 – Jan 2015) : A software development startup with 5 employees based in the United Kingdom primarily in the business of selling ecommerce solutions.

I started working at this firm right after I graduated from Teesside University. I was responsible for developing ecommerce websites and software modules on the PHP platform.

- **Ecommerce Website:** Designed and developed a sports website with a PayPal Payment gateway. Focused on planning, designing, coding and maintaining new features with participation on frontend, backend and 3rd party integrations.

EDUCATION

Bachelors In Computing (2008-2011) Teesside University (Middlesbrough, England)
